

EU labour force survey (EU LFS) states that around 75% of adults in Europe have completed at least upper secondary education. This means that adults with educational attainment below the upper secondary level represent around a quarter of the European adult population.

ICARO aims at designing a customised training path adapted to the needs of each participant in order to get their (re)integration in labour market. We will work with long-term unemployed adult learners, low-skilled and people facing difficulties to access to labour market.

1. It will improve the training of adults educators / employment officers working with long-term unemployed adult learners.
2. Adult learners who will see improved their employability
3. Stakeholders will extend their knowledge about soft skills development and capacities in adult education provision for increased employability.
